

eCampus Asynchronous Degrees

With UAF online degrees, the world is your classroom!

In addition to over 50+ online degree options, and over 600+ asynchronous courses, UAF eCampus also offers a selection of online degree programs that are FULLY asynchronous.

What is an asynchronous course or degree at UAF?

UAF eCampus courses are all accessible online, but asynchronous courses can be completed from any location, and students can access course materials and engage with coursework independently – without scheduled live meetings or real-time interaction with instructors or classmates. Asynchronous courses do not have a set meeting time, but most have weekly deadlines, so be sure to keep up with the course schedule.

Asynchronous Degrees at UAF
